

## **Evaluating and Managing Temporomandibular Injury Cases**

Fundamentals, Clinical, Medicolegal Issues — and Beyond

### **A Must-Attend 16-Hour Limited Attendance Seminar**

#### **Course Description**

This comprehensive, two-day seminar is designed for practitioners who want to elevate their expertise in evaluating and managing temporomandibular joint injury (TMI) cases. It is also ideal for clinicians seeking to implement proven protocols that protect their patients, their practice, and themselves from potential medicolegal risks. In today's medicolegal climate, dental professionals are frequently called upon to:

- Document comprehensive evaluations.
- Determine injury causation and mechanisms.
- Provide accurate diagnoses.
- Estimate impairment ratings.
- Calculate future care costs.
- Present an expert opinion.

This course will equip attendees with the clinical tools and medicolegal insight to approach these challenges with confidence and competence.

#### **Course Objectives**

Participants will learn how to:

- Take thorough injury histories and conduct detailed examinations.
- Explain causation and mechanisms of injury.
- Select and interpret appropriate diagnostic aids.
- Develop treatment plans that meet the standard of care.
- Apply effective therapeutic modalities.
- Determine Maximum Medical Improvement (MMI).
- Estimate permanent impairment ratings and future care costs.
- Prepare objective, defensible case reports.
- Present and defend findings in legal settings.
- Navigate common litigation tactics with confidence.

#### **Featured Speaker**

Dr. Reda A. Abdel-Fattah is a specialist in Orofacial Pain who has practiced in Boca Raton, Florida, for over four decades.

Dr. Abdel-Fattah is a Fellow of the American Academy of Orofacial Pain and the American Academy of Craniofacial Pain, and a Diplomate of the American Boards of Orofacial Pain, Craniofacial Pain, Craniofacial Dental Sleep Medicine, and Dental Sleep Medicine. Dr. Abdel-Fattah has a unique interdisciplinary background, holding advanced degrees in Materials Science and Engineering and Biomechanical Trauma. His scientific foundation, combined with his extensive clinical experience, provides accurate and reliable insights into complex TMJ and dental injury cases.

He has been selected as an expert witness by both plaintiffs and defense attorneys and lectures nationally and internationally.
